

The CLS Coupé

Mercedes-Benz

Risk an

Affair

The first encounter that changes everything. Breathtaking.
Captivating. Sensual Purity and iconic design. It comes over
you suddenly: the urge to possess. Sometimes all it takes
is a moment, and then you're hooked.

Pure longing for
something very special.

The first experience. Immediately beguiling. The silky-smooth power of an in-line 6-cylinder engine has always had a seductive effect on lovers of fine automobiles. Every touch of the accelerator pedal is a sensual experience arousing the desire for more.

Determined to conquer.

The challenge is full on, the front section self-assured in the way it inclines forward. The optional MULTIBEAM LED headlamps exude innovative power. Between them a diamond radiator grille, reminiscent in its outline of certain legendary racing cars. Determined to conquer the road and the hearts of true automotive enthusiasts.

Refined feel. High appeal.

The first touch. Soft leather, fine wood and a glass-fronted Widescreen Cockpit that appears to float freely. It all feels just right. Stimulating the senses. Yet relaxing you at the same time. Even the air vents are given dramatic colour highlights. With optional ENERGIZING comfort control you can boost your concentration and energy levels.

The sense of appreciation grows
with every turn of the road.

Do you ever get a sense of being in just the right place at just the right time? You can enjoy that feeling all the time in the CLS, because the adaptive suspension options DYNAMIC BODY CONTROL and AIR BODY CONTROL ensure optimum adjustment, whatever the driving situation.

Arguably one of the last
style icons of our time.

Widescreen Cockpit.

Futuristic-looking display concept: the two 12.3-inch screens of the instrument display and the media display are mounted together under one continuous piece of glass. This way you can determine the content of the dynamic displays. A choice of three display styles allows you to adapt the look of the instrument display to suit your own preferences. You can select the three display styles directly via the menu on the instrument display. In “Classic” mode the information is presented similarly to in an analogue instrument cluster,

but with the added fascinating options of digital technology. In “Sport” style the displays feature yellow highlights and a sporty design. The “Progressive” setting boasts a futuristic style which turns the potential offered by the digital display into a particularly thrilling experience. In all three styles, the instrument display is divided up into three areas. Various settings allow you to adapt these areas to your individual needs, so that you can keep an eye on whatever you consider to be the most important information.

Exemplary safety with Mercedes-Benz Intelligent Drive systems.

During rush hour, on long drives at night or on unfamiliar routes, your CLS noticeably takes the strain out of driving, particularly in stressful situations. It's all down to a concept that makes every journey in a Mercedes-Benz a safer and exceptional experience: **Mercedes-Benz Intelligent Drive**. Because the time you spend behind the wheel is your time. Time for relaxation. Time to replenish your energy. So that, above all else, you reach your destination even more safely and are also more relaxed when you get there.

DRIVING ASSISTANCE AND SAFETY

Blind Spot Assist takes a very close look for you in the area not covered by the exterior mirror – in particular as soon as you switch on the indicator. The system is thus able to give you a visual and audible warning of side collisions with other road users in the blind spot.

You will soon come to appreciate the convenience of **Active Distance Assist DISTRONIC** in heavy flowing and stop-start traffic. The system takes the strain off you by automatically adapting your own speed to that of slower moving vehicles in front. The desired specified distance can be set in several stages.

Optimum parking service on board. **Active Parking Assist** with 360° camera makes it easier for you to find a parking space and to manoeuvre into and out of parking spaces. Here the choice is yours: park with ease yourself thanks to all-round visibility – or make things even easier still by getting the car to park for you.

Active Brake Assist can help you to avoid rear-end collisions and accidents involving crossing vehicles and pedestrians. Besides distance and collision warning, it also provides situation-dependent brake boosting in the event that you apply the brakes with insufficient force. If you do not react, it can initiate autonomous emergency braking.

MULTIBEAM LED.

Perfect visibility for you: the adaptive **MULTIBEAM LED** headlamps have individually controllable LEDs that react to the given traffic situation. Partial main beam omits other road users without dazzling them. When the road is clear, the ULTRA RANGE Highbeam increases the range by 150 metres. The cornering light and active light functions also optimally light up the field of vision.

ENERGIZING comfort control.

ENERGIZING comfort control transforms your vehicle into an oasis of well-being through the intelligent combination of comfort functions such as air conditioning, lighting and fragrancing. Six perfectly compiled programmes can be activated easily to help relieve stress or boost alertness on long journeys.

Active Multicontour Seat package.

The ultimate in seating comfort – on longer journeys, too: integrated air cushions give you plenty of options for finding your ideal seated position. Pleasant warmth is quickly available on request, as are eight different massage programmes. For those with a sporty driving style, the dynamic side bolsters offer optimum lateral support. The 4-way lumbar support provides for a relaxed posture and relieves the strain on your spine, giving your back the consideration it deserves. This is also confirmed by the German Campaign for Healthier Backs (AGR), which has tested and explicitly recommended the **active multicontour seat**.

Burmester® high-end 3D surround sound system.

Sound on a par with that of luxury home music systems. Speakers in the roof liner compose a three-dimensional sound. They conduct the system like your personal orchestra – with VIP settings for individual seats or style settings such as “Live” or “Easy Listening”.

The AVANTGARDE design and equipment line.

With the AVANTGARDE exterior your vehicle takes on an exceptionally expressive look. The sporty powerdomes are an eye-catching feature. In the rear bumper with insert featuring a diffuser look, the diamond-shaped exhaust tailpipe trim elements are another striking feature. The lowered comfort suspension additionally reinforces the dynamics.

The AMG Line design and equipment line.

The expressive bodystyling of the AMG Line lends your vehicle an exclusive touch. With it you are making a clear statement and showing that a sporty design is important to you. A higher performance brake system with perforated brake discs at the front rounds off the dynamic appearance.

The Night package.

With the Night package your sporty exterior looks even more expressive. Numerous elements are finished in black or high-gloss black. Depending on the paint finish, this creates contrasts or flowing transitions. Whichever you choose: there are always clear benefits in terms of individuality.

designo. Individuality at its most alluring.

The CLS readily impresses in every respect. The only way to improve it is to add your good taste. With your own choice of a special designo paint finish, a variety of trim elements, exclusive upholstery and stylish extras.

DYNAMIC BODY CONTROL suspension with adjustable damping.

One suspension – three set-ups: with **DYNAMIC BODY CONTROL**, you can choose between maximum agility and high damping comfort. To match the route and personal driving style. The 15 mm lower suspension level and the Sports Direct-Steer system create the ideal conditions for adopting a dynamic driving style.

AIR BODY CONTROL.

The multi-chamber air suspension has continuously adjustable damping for an exceptionally high level of ride comfort and driving dynamics. It adapts to the current driving situation, either comfortable or sporty.

On bends or when braking, the air suspension effectively reduces body roll. Via DYNAMIC SELECT, **AIR BODY CONTROL** can be set for a more comfortable or sporty ride in three stages. At higher speeds the suspension is lowered by a further 15 millimetres to further improve stability.

DYNAMIC SELECT

DYNAMIC SELECT changes the handling characteristics at the touch of a button. Use different drive modes which change the characteristics of the engine, transmission, suspension and steering, for example. Whether dynamic in Sport mode, highly relaxed in Comfort mode or particularly economical in Eco mode – you determine precisely what is important to you.

Performing in style.

Every Mercedes-AMG is a masterpiece in its own right, with an unmistakable character. What unites our performance vehicles and sports cars is their irrepressible sporting spirit. Their passion for top performance. It is generated at the point where engineering skill meets a very special attitude: the spirit of AMG. We believe that you have to keep on challenging limits in order to achieve new goals. We accept nothing as a given. Because limits are imposed by people, and it's also people who can overcome them. It's this attitude that enables us to achieve outstanding performance for the race track – and for the road.

Welcome to the world of AMG.
